Technical Account Manager

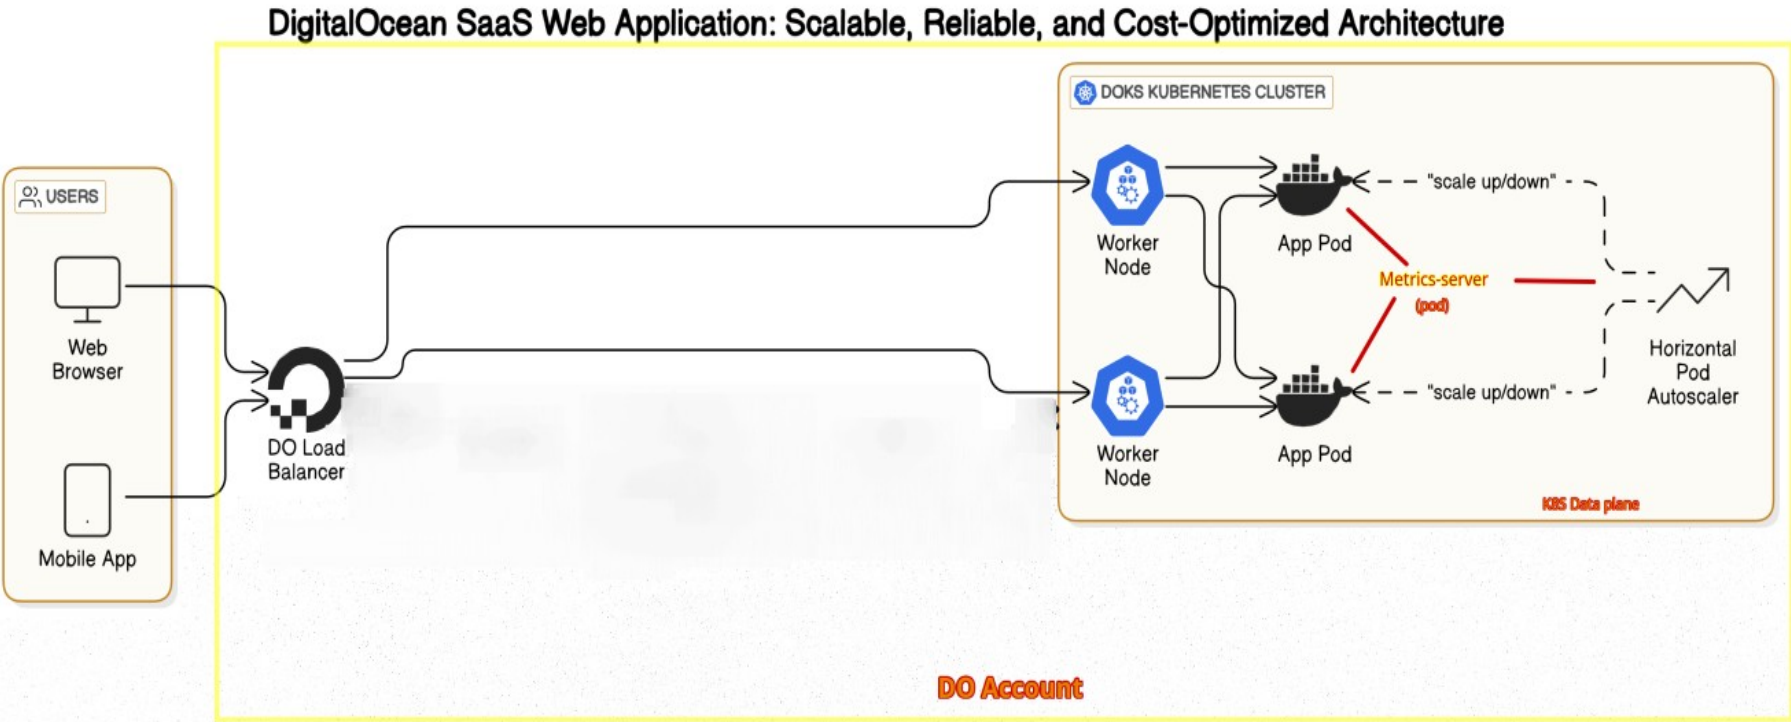

Table of contents

- Current setup
- Whats next: Recommendations and risks

Summary of current infrastructure and performance characteristics

- Infrastructure Overview
 - DOKS Cluster
 - App: Flask app containerized
- High Availability
 - Control plane HA
 - Replicas
- Scalable
 - Autoscaling
 - HPA

Current Architecture

Recommendations for future scaling and cost optimizations.

- Seamless infra monitoring
- Understanding Cloud bill
- Waste prevention strategies
 - Right Sizing – Optimize droplets and pods
 - Cost avoidance with HPA and CAS
- Managed Services
- Other managed or third party services to scale and performance enhancements
